## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation "a mobile equipment", and the claim also recites "in particular a wheel loader or a backhoe loader" which is the narrower statement of the range/limitation.

Claims 2-10 are rejected due to their dependence from claim 1.

Art Unit: 3745

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Ishizaki et al (6561751).

Ishizaki et al discloses a control arrangement having a boom (10) moveable by a boom cylinder (2), a shovel (11) moveable by a shovel cylinder (3), each including a control unit with a pilot control device (4, 5) and a proportional valve (6, 7) for controlling the boom cylinder and the shovel cylinder, respectively, wherein a valve arrangement (37) whereby during lowering of the boom, a control line (19) of the boom control unit acting in the direction of lowering may be connected with a signal line (23) of the shovel control unit, so that the shovel may be taken into a target position by means of the control pressure tapped at the boom control unit.

***Allowable Subject Matter***

Claims 2-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 7127888, 7059237, 6898932, 6389953, 5797310, and 5669282 each disclose control arrangements for machines for synchronizing boom and shovel movement.
